**Cheap 7'wx7'h Custom Banner (84"wx84"h) OPTIONS**

Before placing your order, it's a good idea to view and decide on the following detailed options. **Free Hems and Grommets.**

**GROMMETS**

Provide a convenient method for hanging or attaching vinyl signs at regular points. This distributes the weight and helps to keep the vinyl signs from sagging. Hems Hemmed edges are typically used to reinforce the sides of vinyl banners, helping maintain the banner's shape and prevent stretching. This is particularly helpful when grommets are used on vinyl signs.

**Pole Pockets**

Pole Pockets allow for rigid poles or dowels to be inserted along the edges of the banner. This allows for a more even distribution of the banner's weight to prevent sagging. Opposing pole pockets can also be used to make the banners more rigid.

**Wind Slits**

If you choose this option, we will cut small half-circles into your banner to cut down on wind resistance. This feature is perfect for outdoor banners, as it helps to prevent twisting and flapping in the wind.

**Re-enforced Corners**

Use Banner Re-enforced corners adhesive grommet tabs to turn your digital image into a super-strong outdoor banner, instantly! For outdoor banners over 8 feet, add Re-enforced corners for ultimate strength.

**HEMS**

Hems consist of one inch of the Custom Banner material folded over to the backside of the banner and heated together to form a clean and strong one-inch hem. We recommend having hems for all banners to increase the strength and durability of the banner. We offer free hems on all our banners. Hemmed edges are typically used to reinforce the sides of vinyl banners. This helps to maintain the banner's shape and prevent stretching.

You can choose from ground shipping, 2 days air shipping, 3 days transit shipping, or overnight shipping. **All orders must be approved for print before (1 pm) Eastern Standard.**

**7'wx7'h Custom Banner (84"wx84"h) DURABILITY AND LIFE**

The life of a banner really depends on how it is being used, stored, and taken care of. The more vinyl signs are used, the faster they will wear out. Although, typically banners last for anywhere between 3-6 years. The most custom vinyl banners that can serve your business are 5-10 years or the last 1-2 years. Naturally, if the vinyl banners are being used outdoors 24/7, due to the weather conditions and the sunlight, they will wear out more quickly than if used sporadically, or if used indoors. It is not difficult to maintain a banner and store it, but maintenance really determines the lifespan of vinyl signs. If you are planning to mount your custom vinyl banners outdoors, you are better off getting an extra durable 18-ounce vinyl, and adding slits to the design, if your vinyl banners will be placed against a fence, or hung freely in the air, where it can be blown around. You can consider ordering reinforced corners along with your banner if you are planning to order grommets to hang your banner, as the reinforced corners will ensure extra support to the corners of your banner, and prevent ripping. When storing your banner for later use, we recommend that you roll it and keep it away from dust and extreme heat, as opposed to folding it. When the banner is rolled as opposed to folded, you are preventing the banner from creasing. Though, if the banner is too large, and it is easier to fold over the roll, don't stress out too much, you can always get rid of creases when hanging or laying the banner flat, and applying light heat to the custom vinyl banners, but not too close. If you have any additional questions on how to take proper care of your banner and vinyl banners to ensure a longer lifespan, don't hesitate to call or email us. We will be happy to assist you!
